JN RE BLOOD PLASMA PROTEINS
ANTITRUST LITIGATION

MDL Docket No. _____

**PLAINTIFF PEMISCOT MEMORIAL HOSPITAL'S MOTION TO TRANSFER
RELATED ACTIONS TO THE EASTERN DISTRICT OF PENNSYLVANIA FOR
CONSOLIDATED OR COORDINATED PRETRIAL PROCEEDINGS
PURSUANT TO 28 U.S.C. § 1407**

Plaintiff Pemiscot Memorial Hospital ("Plaintiff"), by its undersigned counsel, respectfully requests the Judicial Panel on Multidistrict Litigation ("Panel") to issue an order pursuant to 28 U.S.C. § 1407 for transfer to and coordination or consolidation in the Eastern District of Pennsylvania for pretrial proceedings of all currently pending and later filed antitrust actions relating to a conspiracy to fix prices and restrict output of Blood Plasma Proteins.

1. To date, at least three antitrust direct purchaser actions have been filed alleging a conspiracy to fix prices and restrain output of Blood Plasma Proteins¹ in

¹ Blood Plasma Proteins are used primarily by hospitals to treat critically ill patients suffering from, among other diseases, various immune disorders. Pemiscot Mem'l Hosp. Compl., ¶ 2. For purposes of the complaints filed, Blood Plasma Proteins refer to Ig and albumin. *Id.*, ¶ 36. Ig is used to treat primary immune deficiencies and certain autoimmune disorders. *Id.*, ¶ 37. Albumin is used to expand blood volume and to prime heart valves during surgery. *Id.*, ¶ 43.

violation of Section 1 of the Sherman Act, 15 U.S.C. § 1 *et seq.* The first-filed civil action is a class action filed in the United States District Court for the Eastern District of Pennsylvania on behalf of all direct purchasers of Blood Plasma Proteins. The second-filed action is also a class action filed in the United States District Court for the Eastern District of Pennsylvania on behalf of all direct purchasers of Blood Plasma Proteins. The third-filed civil action is a class action filed in the United States District Court for the Northern District of Illinois on behalf of all direct purchasers of Blood Plasma Proteins.² Therefore, this motion for transfer and consolidation or coordination is properly before the Panel. Pursuant to Rule 7.2(a)(ii) of the Rules of Procedure of the Judicial Panel on Multidistrict Litigation, a Schedule of Actions for which coordination or consolidation is requested is attached as Exhibit A to the accompanying memorandum in support of this motion (the “Actions”).

2. The Actions proposed for transfer and consolidation or coordination are based on the same operative facts and therefore “[i]nvolve one or more common questions of fact” as required by 28 U.S.C. § 1407(a). Common questions of fact are: (a) whether Defendants conspired to fix the prices and restrict output of Blood Plasma Proteins; (b) the identity of the participants in the conspiracy; (c) the duration of the conspiracy; (d) the nature and character of the acts performed in furtherance of the conspiracy; (e) whether the conspiracy violated Section 1 of the Sherman Act; (f) whether Defendants fraudulently concealed their unlawful conduct; (g) whether Defendants’ conduct injured the business or property of Plaintiffs and members of the proposed class; and (h) the appropriate measure of damages sustained by Plaintiffs and members of the proposed class.

² This action similarly characterizes the relevant products as “Plasma Derivative Protein Therapies.”

3. The United States District Court for the Eastern District of Pennsylvania is the appropriate forum for transfer and consolidation or coordination of the Actions because:

- (a) the first two Related Actions were filed there;
- (b) the majority of Related Actions to date have been filed there;
- (c) the related governmental investigation occurred in nearby Washington, D.C.;
- (d) many of the parties, witnesses and documents, including one of the two domestic defendants, CSL Behring, are located there;
- (e) it is a very accessible forum;
- (f) it has the necessary expertise and resources to efficiently manage this litigation; and
- (g) it has a favorable docket.

WHEREFORE, Plaintiff respectfully requests that the Panel issue an Order transferring the action in the United States District Court for the Northern District of Illinois and all subsequently filed related actions to the United States District Court for the Eastern District of Pennsylvania for consolidated or coordinated pretrial proceedings.

Dated: August 24, 2009

Attorneys for Plaintiff Pemiscot Memorial Hospital

**BEFORE THE JUDICIAL PANEL
ON MULTIDISTRICT LITIGATION**

IN RE BLOOD PLASMA PROTEINS
ANTITRUST LITIGATION

MDL Docket No. _____

**PLAINTIFF PEMISCOT MEMORIAL HOSPITAL'S MEMORANDUM OF LAW
IN SUPPORT OF ITS MOTION TO TRANSFER RELATED ACTIONS TO THE
EASTERN DISTRICT OF PENNSYLVANIA FOR CONSOLIDATED OR
COORDINATED PRETRIAL PROCEEDINGS PURSUANT TO 28 U.S.C. § 1407**

I. INTRODUCTION

Pursuant to Rule 7.2(a) of the Rules of Procedure of the Judicial Panel on Multidistrict Litigation, Plaintiff Pemiscot Memorial Hospital¹ (“Plaintiff”) respectfully submits this memorandum in support of its Motion to Transfer Related Actions to the Eastern District of Pennsylvania for Consolidated or Coordinated Pretrial Proceedings Pursuant to 28 U.S.C. § 1407. There presently are at least three substantially similar antitrust actions pending in two different judicial districts in the United States (“Related Actions”).²

^{1/} Pemiscot Memorial Hospital filed the first complaint in this matter on July 15, 2009 in the Eastern District of Pennsylvania. See *Pemiscot Mem'l Hosp. v. CSL Limited, et al.*, Civil Action No. 3143 (GP).

^{2/} See Schedule of Actions Pursuant to Rule 7.2 of the Rules of Procedure of the Judicial Panel on Multidistrict Litigation (attached as Exhibit A).

Centralization of all related cases in a single judicial district is appropriate because it will promote the just, fair, and efficient conduct of this litigation, eliminate duplicative discovery, prevent inconsistent judicial rulings, and conserve judicial and party resources. That judicial district should be the Eastern District of Pennsylvania because:

- (1) the first two Related Actions were filed there;
- (2) the majority of Related Actions to date have been filed there;
- (3) the related governmental investigation occurred in nearby Washington, D.C.;
- (4) many of the parties, witnesses and documents, including one of the two domestic defendants, CSL Behring, are located there;
- (5) it is a very accessible forum;
- (6) it has the necessary expertise and resources to efficiently manage this litigation; and
- (7) it has a favorable docket.

Accordingly, for these reasons and others set forth in greater detail below, the Related Actions should be centralized in the Eastern District of Pennsylvania.

II. BACKGROUND

A. The Basis of the Litigation

The Related Actions all arise from the same basic facts concerning an alleged multi-year conspiracy among major suppliers of Blood Plasma Proteins³ to raise, fix,

^{3/} Blood Plasma Proteins are used primarily by hospitals like Plaintiffs to treat critically ill patients suffering from, among other diseases, various immune disorders. Pemiscot Mem'l Hosp. Compl., ¶ 2. For purposes of the complaints filed, Blood Plasma Proteins refer to Ig and albumin. *Id.*, ¶ 36. Ig is used to treat primary immune deficiencies and certain autoimmune disorders. *Id.*, ¶ 37. Albumin is used to expand blood volume and to prime heart valves during surgery. *Id.*, ¶ 41.

maintain or stabilize prices and to restrict the output of Blood Plasma Proteins in the United States, a *per se* violation of Section 1 of the Sherman Act, 15 U.S.C. § 1 *et seq.*

These actions follow closely on the heels of the Federal Trade Commission's ("FTC") filing of an administrative complaint that sought to block Defendant CSL Limited's attempted acquisition of a smaller manufacturer of Blood Plasma Proteins on the basis that the deal would substantially reduce competition in the United States for Blood Plasma Proteins. Pemiscot Mem'l Hosp. Compl., ¶ 4. In evaluating the anticompetitive effects that the deal would produce, the FTC discovered evidence from Defendants' own files that "suggests a strong possibility of ongoing coordinated interaction between firms in the plasma industry." *Id.*, ¶ 5. The FTC further has remarked that this evidence, some of which already has been made public, "is similar to language that in other instances has been found to be evidence supporting an illegal price fixing conspiracy," and thus could expose Defendants to "possible treble damages actions." *Id.*

B. The Related Actions

At least three Related Actions have been filed in two different judicial districts. In particular, two Related Actions have been filed in the Eastern District of Pennsylvania. One Related Action has just been filed in the Northern District of Illinois, prompting Plaintiffs' instant motion before the Panel.

The Related Actions share the same core allegations – a conspiracy to raise, fix, maintain or stabilize prices and to restrict the output of Blood Plasma Proteins in the United States. The Related Actions are all grounded in substantial part in the evidence the FTC recently uncovered regarding Defendants' sales and marketing practices in the

Blood Plasma Proteins industry. In addition, the Related Actions all seek certification of a class of direct purchasers of Blood Plasma Proteins and allege identical or substantially similar class periods.

III. ARGUMENT

The Related Actions should be transferred to the Eastern District of Pennsylvania for coordination or consolidation of pretrial proceedings under 28 U.S.C. § 1407. For the reasons set forth below, this District – more than any other jurisdiction in general, and certainly more than any other jurisdiction specifically under consideration – represents “the center of gravity for this litigation.” *In re Municipal Derivatives Antitrust Litig.*, 560 F. Supp. 2d 1386, 1387 (J.P.M.L. 2008).

A. Centralization of the Related Actions is appropriate.

28 U.S.C. §1407(a) authorizes the Panel to consolidate or coordinate and transfer two or more civil cases that are pending in different judicial districts: (1) when the cases involve “one or more common questions of fact;” (2) when such consolidation or coordination and transfer “will be for the convenience of the parties and witnesses;” and (3) when such consolidation or coordination and transfer “will promote the just and efficient conduct of such actions.” The purpose of this statute is to conserve judicial resources, avoid duplicative discovery and inconsistent discovery rulings and schedules, and reduce litigation time and costs. MANUAL ON COMPLEX LITIGATION, THIRD ¶ 31.13 at 251 (1995).

1. The Related Actions involve common questions of fact.

Each Related Action alleges similar facts giving rise to claims based on antitrust violations; namely, that Defendants conspired to fix prices and restrict supply of Blood

Plasma Proteins in violation of Section 1 of the Sherman Act. The actions involve numerous common issues of fact, including:

- whether Defendants conspired to fix the prices and restrict output of Blood Plasma Proteins;
- the identity of the participants in the conspiracy;
- the duration of the conspiracy;
- the nature and character of the acts performed in furtherance of the conspiracy;
- whether the conspiracy violated Section 1 of the Sherman Act;
- whether Defendants fraudulently concealed their unlawful conduct;
- whether Defendants' conduct injured the business or property of Plaintiffs and members of the proposed class; and
- the appropriate measure of damages sustained by Plaintiffs and members of the proposed class.

These common questions of fact are plainly sufficient to warrant centralization, as the Panel has held on many occasions. *See In re Refrigerant Compressors Antitrust Litig.*, --- F.Supp.2d ---, 2009 WL 1649482, at *1 (J.P.M.L. June 9, 2009) (centralization ordered where “[t]hese actions share factual questions relating to allegations that defendants conspired to fix, raise, maintain, and stabilize the price at which refrigerant compressors and products made with compressors were sold”); *In re Chocolate Confectionary Antitrust Litig.*, 542 F. Supp. 2d 1376, 1377 (J.P.M.L. 2008) (centralization ordered where “these actions arise from allegations that defendants conspired to fix, raise, maintain and/or stabilize the price of chocolate confectionary products”).

2. Centralization will further the convenience of the parties and witnesses.

Centralization also will further the convenience of the parties and witnesses in these cases because it will result in significant time and cost savings in pretrial proceedings. Plaintiffs' similar allegations will require duplicative discovery (in the form of written discovery requests, document production, and depositions) and pretrial proceedings (including briefing and hearings on dispositive motions and on class certification) unless the actions are consolidated or coordinated for pretrial purposes in one district. Centralization will solve these problems by permitting a single judge to formulate and implement one pretrial program designed to minimize inconvenience and expense for all parties and witnesses. *See Refrigerant Compressors*, 2009 WL 1649482, at *1 ("Centralization will eliminate duplicative discovery; prevent inconsistent pretrial rulings, including with respect to class certification; and conserve the resources of the parties, their counsel, and the judiciary"); *In re Aftermarket Automotive Lighting Prods. Antitrust Litig.*, 598 F. Supp. 2d 1366, 1367 (J.P.M.L. 2009) (same).

3. Centralization will serve the interests of judicial economy and consistency.

Finally, centralization will serve the interests of both judicial economy and consistency. It will result in one judge overseeing the proceedings. Because the actions likely will involve the same pretrial issues, such as those concerning the nature and scope of discovery and the sufficiency of the allegations and defenses, assigning a single judge to oversee these issues will promote economy. Assigning a single judge also will ensure that significant issues raised in this case, such as class certification and application of the antitrust laws, are addressed in a consistent and uniform manner. *See In re Pharmacy*

Benefit Managers Antitrust Litig., 452 F. Supp. 2d 1352, 1353 (J.P.M.L. 2006); *In re Polychloroprene Rubber Antitrust Litig.*, 360 F. Supp. 2d 1348, 1350-51 (J.P.M.L. 2005).

Because each criterion listed in Section 1407(a) is met, the Panel should transfer the actions to a single district for coordination or consolidation.

B. The Related Actions should be transferred to the Eastern District of Pennsylvania.

Centralization of the Related Actions in the Eastern District of Pennsylvania for consolidated or coordinated pretrial proceedings will best serve the convenience of the parties and witnesses and the interests of justice. Among the factors the Panel considers in determining the appropriate transferee forum are: (1) where the first related action was filed; (2) where the most related actions are pending; (3) the location of related governmental proceedings; (4) the location of the parties, witnesses, and documents; (5) the accessibility of the proposed transferee forum; (6) the extent of the proposed forum's experience and familiarity with the types of issues presented; and (7) the proposed forum's docket. All of these factors decidedly favor centralization in the Eastern District of Pennsylvania.

1. The first two Related Actions were filed in the Eastern District of Pennsylvania.

The first two Related Actions were filed in the Eastern District of Pennsylvania. Furthermore, more than one month has passed from the date that the first Related Action was filed in that District to the date that a Related Action was filed in another jurisdiction. These facts militate in favor of transfer to the Eastern District of Pennsylvania. See *In re Marine Hose Antitrust Litig. (II)*, 531 F. Supp. 2d 1381, 1382 (J.P.M.L. 2008) (transferring cases to Southern District of Florida because, among other

reasons, “that is where the largest number of actions have been brought (including the first-filed action”); *In re Hotel Telephone Charge Antitrust Litig.*, 341 F. Supp. 771, 773 (J.P.M.L. 1972) (holding the most suitable transferee district was the one were the first suit was filed). *Accord In re Vitamin C Antitrust Litig.*, 416 F. Supp. 2d 1352, 1353 (J.P.M.L. 2006) (Panel “persuaded that the Eastern District of New York is an appropriate transferee forum for this litigation” where, among other things, it had “the only action pending more than a few months”).

2. The most Related Actions are pending in the Eastern District of Pennsylvania.

Not only were the first two Related Actions filed in the Eastern District of Pennsylvania, but the majority of Related Actions have been filed there. Of the three Related Actions filed to date, two are pending in the Eastern District of Pennsylvania, and only one is pending in the Northern District of Illinois. This factor also militates in favor of transfer to the Eastern District of Pennsylvania. See *In re Refrigerant Compressors*, 2009 WL 1649482, at *1 (transferring cases to forum where most of the cases were pending, and citing this factor as one of the bases for transfer); *Aftermarket Automotive Lighting Prods.*, 598 F. Supp. 2d at 1368 (transferring cases to district where all but one of the actions were already pending); *Marine Hose*, 531 F. Supp. 2d at 1382 (transferring cases to forum because, among other reasons, most of the cases were pending there).

3. Related governmental proceedings occurred in a nearby location.

The FTC investigation that helped form the basis for the Related Actions occurred in close proximity to the Eastern District of Pennsylvania, in Washington, D.C. The Panel places considerable weight on the location of a related governmental investigation

in deciding where to transfer antitrust litigations. *See Municipal Derivatives*, 560 F. Supp. 2d at 1387 (transferring litigation to district that was home to underlying governmental investigation); *Marine Hose*, 531 F. Supp. 2d at 1382 (transferring cases to the district “where a grand jury investigation into the marine hose industry is underway”); *In re Foundry Resins Antitrust Litig.*, 342 F. Supp. 2d 1346, 1347 (J.P.M.L. 2004) (“The presence of the government investigation and federal grand jury in the Southern District of Ohio also tilts toward centralization in the Southern District of Ohio.”). While the FTC investigation occurred in Washington, D.C., rather than the Eastern District of Pennsylvania, Washington, D.C. is much closer to the Eastern District of Pennsylvania than to the Northern District of Illinois. Thus, the same logic underlying the Panel’s decisions in the cases cited immediately above supports centralization in the Eastern District of Pennsylvania.

4. Many of the parties, witnesses and documents, including one of the two domestic defendants, are located in the Eastern District of Pennsylvania.

CSL Behring, one of the two domestic defendants named in this litigation, is headquartered in King of Prussia, Pennsylvania, which is a short car or train ride to Philadelphia and within the Eastern District of Pennsylvania. Consequently, many of the relevant witnesses and documents likely will be located in or near this District. *See Alba Conte & Herbert Newberg, NEWBERG ON CLASS ACTIONS* §9:16, at 345 (4th ed. 2002) (noting that the location of the defendants’ principal offices is a significant factor upon which the Panel relies in choosing a transferee forum because most of the relevant witnesses and documents likely will be found there). In situations like this, the Panel frequently has transferred cases to a defendant’s home district. *See In re Parcel Tanker*

Shipping Services Antitrust Litig., 296 F. Supp. 2d 1370 (J.P.M.L. 2003) (transferring litigation to district where “one defendant” out of several “is located there and documents and witnesses will likely be found there”); *see also Aftermarket Automotive Lighting*, 598 F. Supp. 2d at 1368 (“In addition, several defendants are headquartered within the Central District of California and accordingly pertinent documents and witnesses are likely located there.”); *In re Southeastern Milk Antitrust Litig.*, 530 F. Supp. 2d 1359, 1360 (J.P.M.L. 2008) (transferring cases to district where “two of the defendants have a presence”). This factor therefore supports centralization in the Eastern District of Pennsylvania.

5. The Eastern District of Pennsylvania is an easily accessible forum.

Philadelphia is a convenient air and rail transportation hub, serviced by both Philadelphia International Airport and Amtrak, and this will benefit the management of this case. *See In re Insurance Brokerage Antitrust Litig.*, 360 F. Supp. 2d 1371, 1373 (J.P.M.L. 2005) (choosing as a transfer forum an “accessible metropolitan location geographically convenient for many of the docket’s litigants and counsel”). Indeed, the Panel expressly has recognized that this District is accessible and well suited to handle similar antitrust litigation. *See In re Methyl Methacrylate (MMA) Antitrust Litig.*, 435 F. Supp. 2d 1345, 1347 (J.P.M.L. 2006) (concluding that the Eastern District of Pennsylvania was an appropriate district because it “is an accessible location that will be geographically convenient for many of this docket’s litigants, witnesses and counsel” and also noting that “the district is well equipped with the resources that this complex antitrust docket is likely to require”). Accordingly, this factor supports centralization in the Eastern District of Pennsylvania.

6. The Eastern District of Pennsylvania has the necessary expertise and familiarity with the types of issues presented to efficiently and prudently manage this litigation.

The Eastern District of Pennsylvania has a well deserved reputation for the just and efficient handling of complex antitrust cases. The Panel regularly considers the experience of the transferee forum in managing complex litigation. *See Pharmacy Benefit Managers*, 452 F. Supp. 2d at 1354 (“We are persuaded that the Eastern District of Pennsylvania . . . has the experience to steer this litigation on a prudent course.”); *In re Janus Mutual Funds Investment Litig.*, 310 F. Supp. 2d 1359, 1361 (J.P.M.L. 2002) (selecting a transferee forum with “the experience to steer this litigation on a prudent course”).

Here, the Eastern District of Pennsylvania’s expertise in managing MDL proceedings and complex litigations like this one is impressive. According to the Panel’s statistics on terminated multidistrict litigation through September 30, 2008, the Eastern District of Pennsylvania has overseen 60 multidistrict litigations over the years, 19 of which were classified as antitrust cases. United States Panel on Multidistrict Litigation, Multidistrict Litigation Terminated Through September 30, 2008 (attached as Exhibit B), at 10-12, available at http://www.jpmr.uscourts.gov/General_Info/Statistics/Terminated_Dockets_2008.pdf. In comparison, the Northern District of Illinois has handled 53 multidistrict litigations over the years, 12 of which were classified as antitrust cases. *Id.* at 22-23.

Moreover, the proposed transferee judge, the Honorable Gene E.K. Pratter, is a respected jurist who has served on the federal bench since 2004. Judge Pratter has significant experience in complex commercial litigation, both as a judge and previously

as a partner at Duane Morris LLP, a national law firm based in Philadelphia. Judge Pratter presently is presiding over one multidistrict litigation, *In re Processed Eggs Antitrust Litig.* (MDL No. 2002). In the Panel's decision to transfer that litigation to Judge Pratter, it noted that she "is willing to handle the matter and her docket conditions will allow her to devote the necessary attention to the case." *In re Processed Eggs Antitrust Litig.*, 588 F. Supp. 2d 1366, 1368 (J.P.M.L. 2008). The same is true today, as Judge Pratter "has a caseload that is relatively favorable to steer this litigation on a prudent course." *Refrigerant Compressors*, 2009 WL 1649482, at *1.

The Eastern District of Pennsylvania and Judge Pratter clearly have the capability, experience, and resources to efficiently handle the Related Actions. Accordingly, this District is a desirable transferee forum.⁴

7. The Eastern District of Pennsylvania has a favorable docket.

Finally, the Eastern District of Pennsylvania is an efficient choice for a transferee forum. The Panel looks to caseload statistics to determine the district that will be the most efficient in managing and progressing the litigation. See *In re Refined Petroleum Prods. Antitrust Litig.*, 528 F. Supp. 2d 1365, 1367 (J.P.M.L. 2007) (transferring cases to a district that "enjoys favorable caseload conditions"); *Parcel Tanker Shipping Services*, 296 F. Supp. 2d at 1371 ("the Connecticut district has a relatively favorable caseload for accepting this assignment"). An examination of these statistics reveals that the Eastern District of Pennsylvania is the most logical choice to oversee this litigation.

^{4/} Should the Panel decide that Judge Pratter's docket would not lend itself to the efficient management of this litigation, the Eastern District has numerous other judges with the experience and expertise to handle a complex antitrust case like this one, including Judge Berle Schiller, to whom the second-filed Complaint has been assigned.

The Eastern District of Pennsylvania has judicial management statistics superior to those of the Northern District of Illinois, particularly with respect to weighted case filings per judgeship. According to statistics provided by the Federal Judicial Center, the Eastern District of Pennsylvania had only 371 weighted filings per judgeship for the 12-month period ending on September 30, 2008, whereas the Northern District of Illinois had 461. See U.S. District Courts, Judicial Caseload Profile, available at <http://www.uscourts.gov/cgi-bin/cmsd2008.pl> (attached as Exhibit C). This comparison is significant because weighted filing statistics are the most accurate measurements of a district's particular judicial efficiencies. They reflect more than the mere number of cases pending in a district, and instead provide a means for "accounting for the different amounts of time district judges require to resolve various types of civil and criminal actions." Statistical Profiles, Explanation of Terms, Weighted Filings, available at <http://www.uscourts.gov/fcmstat/intro97/terms.html>.

Additional meaningful caseload statistics also favor the Eastern District of Pennsylvania. In the Eastern District of Pennsylvania, the median time from filing to disposition for civil cases is 4.8 months, compared to 6.2 months in the Northern District of Illinois. See U.S. District Courts, Judicial Caseload Profile, available at <http://www.uscourts.gov/cgi-bin/cmsd2008.pl>. And 10.2% of Northern District of Illinois civil cases have been pending for over 3 years, while only 1.4% of cases in the Eastern District of Pennsylvania have been pending for that long. *Id.*

IV. CONCLUSION

The numerous factors that the Panel typically examines in determining where to centralize multidistrict litigations decidedly favor centralization in the Eastern District of

Pennsylvania. For the foregoing reasons, Plaintiff respectfully requests that the Panel transfer the Related Actions to this District.
